By R. R. Batson.

37% business conditions of the last year, an unmistakable note of optimism is rectly forecasting the outlook for the 334

No better indication of the real opinions of bankers and business men on the outlook can be furnished than 26 by the preparations railroads are making for taking care of a large in-65 crease in traffic.

Very recently it was predicted in this column that many of the largest transportation companies in the counnouncement that the Union Pacific

than \$43,000,000 for equipment, additions, extensions, &c.

The Ruchington Railroad is the latest to decide to place large orders for equipment. It will place orders half a dozen equipment concerns ineluding the American Car and Foun-

A large part of the financial element 14% has expressed surprise that these orders have been placed in view of the 25% fact that the surplus idle cars now on leafid and in good working condition total more than 400,000. But every competent railroad man knows that in general business this surplusage would no longer exist, that, in fact, 73% there would be a real shortage of

Managers of the large railroad systems are naturally advised in these matters by bankers who are the financial sponsors of the systems. And in placing these orders they are, of course, acting in accordance with the orinions on the business outlook of

What is true in the railroad field i likewise true of many other industries. And it is because bankers and leading business men view the outlook so optimistically that the stock market is so strong.

It is interesting to note that while railroad net earnings are making their 29% poorest showing, the average price of railroad stocks is at the highest point This signifies that while investors who do not read conditions aright have been selling their holdings because of poor earnings and reports of impending receiverships, insiders and big interests have been steadily accumulat-

the general public never buys stocks for investment purposes when business is in a depressed condition and when stocks are at their lows, but prefers to wait until the market has bad a shear adversed buys stocks.
